DATA SCIENCE CAREERS FOR BEHAVIORAL AND SOCIAL SCIENCE MAJORS

THURSDAY, APRIL 11, 6:30 P.M.
VALDERS HALL OF SCIENCE 362

In an emergent, multidisciplinary field, data scientists come from diverse backgrounds. Marschall, a 2012 Luther psychology major, explains how he pursued a career in the data science field and gives advice to other social science majors on how to do the same. Topics of discussion will include training and preparation, data science as a fulfilling career, and how to get your first job.

R YOU READY? TAKING SMALL STEPS TOWARD BECOMING AN R STATISTICS USER

FRIDAY, APRIL 12, 4 P.M.
VALDERS HALL OF SCIENCE 350

R is a versatile, open-source programming language that is popular in statistical and data science applications. This 60-minute talk will cover what R is, how to get it, why you want to learn it, and how to begin. In the following optional 60 minutes, a hands-on seminar will cover 10 essential packages that every R user should know, guiding new and intermediate users as they learn the language.

LUTHER COLLEGE ALUMNUS

JUSTIN MARSCHALL

Justin Marschall is a data scientist for D.M. Services, Inc. (an affiliate of Colony Brands, Inc.), where he specializes in predictive modeling and machine learning related to user experience and customer satisfaction. He completed a master's degree in psychology from Iowa State University with an emphasis in quantitative analytics and experimental research. Justin is a 2012 graduate of Luther College, where he studied psychology and conducted research with Loren Toussaint on forgiveness and health. His research has been published in top-tier academic journals and presented at national conferences.
